Context	

This supporting paper explains the background designation of the proposed Bingley Town Local Character Buildings and Structures of Local Heritage Interest in the draft Neighbourhood Plan. It

sets out the background to the proposed Local Character Buildings and Structures of Local Heritage Interest and explains the methodology used.

Policy Context

The National Planning Policy Framework (NPPF)¹ sets out the Government's planning policies for England and how these are expected to be applied.

Section 12 (paragraphs 126-141) of the NPPF covers all aspects of the historic environment. Paragraph 126 states that "Local planning authorities should set out in their Local Plan a positive strategy for the conservation and enjoyment of the historic environment".

The definition of heritage asset in the Framework is "a building, monument, site, place, area or landscape identified as having a degree of significance meriting consideration in planning decisions, because of its heritage interest".

The NPPF also introduces the concept of non-designated heritage assets. A non-designated heritage asset is described as a, "building, monument, site, place, area or landscape identified as having a degree of significance but which is not afforded statutory protection through Listed Building, Scheduled Monument etc".

Paragraph 135 of the Framework states that non-designated heritage assets can merit consideration in planning matters, "taking a balanced judgement having regard to the scale of any harm or loss and the significance of the heritage asset".

The following report identifies assets in the Parish that have been identified of special local heritage interest to meriting consideration in planning decisions but which are not formally designated heritage assets.

The Plan has taken the opportunity, using published good practice guidance from Historic England², to identify a schedule of assets that are considered to have significant local heritage interest. To ensure that these assets are considered appropriately in planning proposals, the Plan designates them as Bingley Town Character Buildings and Structures of Local Heritage Interest.

An approach which is supported by the Bradford Core Strategy³. Sub Area Policy AD1: Airedale, which covers Bingley and the surrounding settlements, makes specific reference to the need to, *"Conserve and enhance the designated and undesignated heritage assets"*.

Criteria for the identification of Assets

The potential assets were identified through two main sources:

- Firstly, local knowledge; and
- Secondly, historic environmental records, for example, that contained on the HeritageGateway database⁴.

Through this process, a list of potential buildings and structures were developed.

The proposed assets were then assessed for their appropriateness for designation as local character buildings and structures using the process and criterion developed by Historic England in its publication 'Local Heritage Listing'⁵, and set out below. This was purposefully chosen to ensure a consistent approach, and that it was based on good practice.

Satisfied that they met, in principle, the criteria for going forward as local character buildings and structures of local heritage interest, they were then "tested" through the Plan process. In particular, the proposed buildings and structures were set out for comment during the consultation on the draft Neighbourhood Plan undertaken in late 2018.

Criterion 1.

The item meets the government's definition of a heritage asset.

Demonstrate that the asset falls within the government's definition of a heritage asset; i.e. a building, monument, site, place, area or landscape.

Criterion 2

The item possesses heritage interest that can be conserved and enjoyed.

Identify the properties of the asset that need to be cared for as heritage – this is its heritage interest. This might include physical things like its appearance and materials, as well as associations with past people or events. Consider whether the physical features of the candidate asset help to illustrate its associations. The four types of heritage interest listed are recognised in national planning policy.

Criterion 3.

The item has a value as heritage for the character and identity of the neighbourhood because of the heritage interest beyond personal or family connections, or the interest of individual property owners.

How the heritage interest you identified in Question 2 is of local value - this is its heritage value. The types of heritage value suggested on the nomination form are based on national guidance by English Heritage.

Criterion 4.

The item has a level of significance that is greater than the general positive identified character of the local area.

What raises the assets heritage value to a level that merits its consideration in planning? Many features of the historic environment are a valued part of local character that should be

⁴ http://www.heritagegateway.org.uk/Gateway/Results.aspx

⁵ https://historicengland.org.uk/images-books/publications/local-heritage-listing-advice-note-7/

managed through policies relating to townscape character in the local plan. Registered heritage assets should stand out as of greater significance than these features for their heritage value. The suggested options listed on the nominations form are based on national best practice.

How is the asset locally valued as heritage?	

How is the asset locally valued as heritage? Sir James Roberts was one of a consortium of local businessmen who bought Salts Mill when Sir Titus Salts went into liquidation. Within 8 years he was sole owner. He then then moved the family to another house called The Knoll in Baildon. Eventually he took over Milner Field too,

the great house that Titus Jnr had built.

In 1897 Sir James Roberts became a member of Shipley Urban District Council, eventually becoming chairman of that council. He was also a member of the West Riding County Council and a Justice of the Peace. In 1909 he was created a baronet in the King's Birthday Honours. He was a keen advocate of free trade and was the first chairman of the West Riding Free Trade Federation. He endowed a leaving scholarship at Bingley Grammar School and the chair of Russian at Leeds University. He also bought Haworth Parsonage which was opened to visitors in 1928. There is a Roberts Street in central Bradford and a Roberts Park in Saltaire.

The row of 5 cottages on Gawthorpe Lane were thought to the labourers and carters wo	rking on
the Gawthorpe Estate and at Gawthorpe Hall. Gawthorpe Hall is Grade II listed. A bean	n in one
of the houses dates from the early 1700's, though there is a possibility the beam cou	ıld have

been "recycled" from an earlier building. However, the cottages do appear on the earliest map known of, which is dated 1830. The land behind the cottages was used as grazing for draught horses and could have been tended to by the occupants of the cottages. It was thought sensible for the horses and carts to be reasonably close to the main road, this being Toad Lane (now Park Road).

At that time the County Council was planning to build the Training College for the Train	ing of
Women Teachers. Though the College was a purely County institution, its presence on t	he
outskirts of town was seen as being an asset to Bingley. Part of the reason that Bingley	was
chosen for the College site was the infrastructure of schools in the local area where stu	dent

teachers could teach and be assessed. Local schools also used the College for pupils to visit, be taught and to attend summer camps in the grounds of the college. Thus the College and local schools such as Myrtle Park and Priestthorpe were part of a "whole" educational heritage.

What is it about the asset that provides this interest?	

As a result of The Education Act of 1902 School Boards, including the Bingley School Board, were abolished. Power was handed over to Local Education Authorities at County level. In 1904, Training College Provision in the West Riding was considered and the West Riding County Council approved the building of a new College for Women Teachers. In 1908, the County Council purchased a site at Lady House Farm, off Lady Lane, in Bingley from the owners of the land, Bingley Grammar School.

The main college building (now the Mansion) is Grade II listed, the others are not. The college and its halls of residence opened in 1910. There are also the old buildings behind the Mansion thought to be part of Lady Lane School. Despite intense competition from a dozen other potential sites in Yorkshire, Bingley won the tender for the Training College.

The College and Halls of Residence were all built as a complete residential unit and opened in 1910. They were commissioned by the West Riding County Council, the architect being J Vickers Edwards and the builders being W Airey of Leeds.

What is it about the asset that provides this interest?	

There are 2 limekilns and 4 arched stone chambers built within the embankment and supported by a masonry retaining wall to the canal near Micklethwaite Bridge.

One of the main purposes of the Leeds Liverpool canal was to transport limestone from Skipton. The limestone was layered with coal and burnt over several days in the lime kilns that ran along the length of the canal. This reduced the limestone to lime, which could then be used to sweeten the soil for fertilising in the fields as well as mortar for building the nearby mills and houses. The stone chambers were used to store coal, and possibly burnt lime (quicklime).

Lime kilns also served the local tanneries as lime was used in the preparation of the hides in leather making. Lime Street in Bingley is named after its canal-side kilns.

The use of lime kilns was integral to the historic development of Bingley as a mill town with a farming community on its outskirts. Bingley was known as a centre for lime burning from the 17th Century, even before the canal came, using limestone brought down by glaciers.

They have only recently been discovered on private land. The stone chambers are visible	e but
the actual lime kilns can only partially be seen. If fully excavated, the site could be used	as a
tourist attraction to promote interest along the canal. They tell the story of the develop	ment of

Bingley through time and the importance of the canal in its development.

How does this contribute to its value?

Age - An 1826 survey showed lime kilns up and down the canal, including at this site. However, it is believed they were built when the canal was built in c1774, or shortly after.

Rarity - Whilst there is one limekiln partially visible at Morton Lane, just outside the parish, this has been built over. This is the site of the last known limekilns in the area and the last opportunity to preserve them.

Integrity – The site would need excavating to see the complete limekilns.

However, there are also the remains of a weighbridge, evidenced by kerbstones around the edge, a section of wall which adjoined a block of horse stables from the towpath level, and from below, and the Stone Chambers used for coal storage, and possibly burnt lime. The condition of the chamber walling is poor.

Carved rocks indicate activity- typically farming, hunting, trading, performing rituals. Laythorpe Farm (1737) ("Laythorpe" may mean a Danish/Viking medieval place of law or judgement) is in the North West of the fields, Thomas de Greenhill is recorded as living in Bingley in 14C, Greenhill Farm is dated 1692. Rig and Furrow patterns visible in the fields are often a sign of medieval ploughing. The field enclosures are Viking to 19C in outline. Charcoal burning platforms (post medieval to 19C) have been found in Greenhill Woods by a 2018 Celebrating our Woodlands survey, indicating harvesting of the woods.

Bronze aged cup and ring markings on rocks are often found with others nearby and near a water supply and a vista. This rock carving is close to a spring and has open views to the North West up the dale towards Skipton, and to the East. The 2018 survey mentioned above also found a gritstone rock adjacent in Greenhill Wood with a single cup, and other nearby boulders have potential for similar marking. There are very few known carved rocks so close to the valley floor in the Bingley area.

Whilst the rock is on private land, the site could be developed for housing. Steps should be taken to preserve it - for instance with a green space in front of it and a drystone wall around it.

A field system with a series of native hedgerows and dry-stone walls, some with origina	I
gateposts, which form field divisions within the Greenhill fields. The 1840's tithe survey	,
showed the boundary lines of the fields to be the same as the current field system and	
therefore they are evidence of historic agricultural plotting. Some of the boundaries fol	low the
historic parish boundary between Micklethwaite and Bingley.	
The fields slope towards the valley bottom and many are terraced at their boundaries.	
There is a distinct difference in the pattern of enclosure to the east and west. The	-
elevation fields have irregularly shaped boundaries. This form of enclosure is like	•
relatively early (possibly relating to the Viking occupation), representing the ad hoc encl	-
individual farmers/families of areas of moorland. In contrast to this, is the more regular	•

The fields represent a considerable port of Division's representation action by the set and are	at:11:4a

The fields represent a considerable part of Bingley's remaining agricultural past and are still in pastoral use. They show the historic boundaries within the field with evidence of who owned each part of the land.

Kingfishers have been seen along the hedgerows and the ducks and geese abound along the canal in this natural environment.

Local people and other visitors place great value on this landscape- the green space, presence of dry stone walls, historic gateposts, native hedgerows, trees and woodland.

Above the fields are views to the moorland/ South Pennine areas.

Housing developers for the fields have recognised the historic importance of the field boundary lines and have agreed to recognise and conserve some of them. Any development of the site could plan for groups of housing around these boundaries. Surveys indicate a good number of trees of good quality which are worthy of protection.

This landscape of fields and hedges is in a popular area of the Leeds Liverpool Canal which is much visited by local people and visitors to the Five Rise Locks. They are also viewed by the public when visiting the café, walking and cycling along the towpath as well as many tourists on barges travelling lengths of the canal.

With the historic evidence, wildlife and their aesthetic qualities they are a significant asset to Bingley, and the Bradford District's, Environment and Heritage.

The field is still roughly divided into its original boundaries which could continue to be recognised even after the site is developed for housing; for instance, street names could reflect the original field names.

Quaker Hill is a series of cobbled stone steps going up from Wellington Street to Char	oel Lane.

Quaker Hill is a series of cobbled stone steps going up from Wellington Street to Chapel Lane, and listed on the on HER register. They were possibly built pre 1848 – at that time there was a building either side of the location of the steps, with a visible gap between the buildings, providing a wide open staircase down to the Railway Station. The buildings have gone and been replaced with a green space to either side.
