

For appendix. EGM Wednesday 12th May

Friends of Myrtle Park CIL Grant.

FOMP contacted the council in regard to work in progress on the building in Myrtle Park. Half of the floor is concrete, the other half wooden planks. On investigation, it has been found that the wood is rotten and needs to be replaced completely. This will cost £1200. The original grant included the sum of around £1200 for the purchase and installation of information boards.

The request is for the sum of £1200 to be redirected for remedial work to the floor, as other work cannot be completed till the floor is safe.

The information boards are not needed until the rest of the building/ remedial work is undertaken. If this expenditure is agreed by Bingley Town Council, FOMP will submit a further grant application for the cost and installation of these at a later date.
